

The Only Secret is our incredible **TECNOLOGY**

GIDUE launches new QUADRA-6 press, for emerging self-adhesive label markets.

Nuova GIDUE S.r.l. introduces the new QUADRA™-6 press, 370mm web width, a compact inline label press, which includes 6 colours UV flexo, 1 die-cutting, delam-relam, cold foil, Organizer™ for easy loading of die-cutting tools.

The QUADRA™-6 is a possible alternative for converters who are looking for high printing quality, at a reasonable price, and a small footprint (the press is less than 4 meters long).

Giorgio Deliziosi, GIDUE area manager for the "BRIC" countries (Brazil, Russia, India, China) states: "we would like to offer to label converters an affordable alternative to "low cost" flexographic and letterpress presses, with a high quality QUADRA™-6 which includes the patented GIDUE "Flower™" technology, plus other GIDUE "value" adding converting features. We would be happy to make the GIDUE technology available to a greater number of converters, in order to help to support their growth during the years."

the new QUADRA™-6 "compact" GIDUE label press.

The first QUADRA™-6 was successfully installed in December 2010 at **Wropack** in Poland by GIDUE's distributor Rotary Die Company.
