

# M4 in line flexo press

*The perfect press to print with excellent register quality*

*The most effective printing press line in BOBST portfolio, M4 takes the advantages of Digital Flexo™ and Excellence™ technologies with the simplest and most durable semi-servo electronic drive. M4 line introduces new accuracy standards in servo controls and in manufacturing, to achieve excellent register quality and stability, to eventually print extended 7 colour gamut with perfect registration, at all speeds. M4, M5 and M6 presses share the same technology platform to perform the full BOBST Digital Automation program.*

*Free and flexible configuration dedicated to labels and flexible packaging converters, the M4 is available in two configurations:*

**M4 - Labels and films**

**M4L - PS labels**

**Short web path**

**Over-dimensioned chilled drums for "positive" web transportation on most "delicate" substrates**

**"Easy" drop-in technology for fast interchangeability of flexo, screen and hot foil**

**Digital Flexo™ and DigiGap™ for digitally automated print and die-cutting pressure control, the shortest "digital" set up time and waste digitally assisted, consistent quality during production**

**Digital Flexo 4.0™ for "closed loop" "pro-active" print quality/PDF control at all speeds**

**DigiMount™ for true Digital Work Flow from plate mounting to the press**

**Min 5,5" print repeat, to reduce cost of flexo plates**

**Metronome™ high speed semi rotary die-cutting, to reduce cost of flexible dies**

**ExcelCut™ and ExcelDie™ for automated exchange of flexible dies and magnetic cylinders**

**ExcelPrint™ for automated exchange of flexo print cylinder**

**Digital Automation ready for REVO Standards.**

**The perfect press to reduce speed change effects during production.**
