

M5 LINE For Labels and Flexible Packaging

“DIGITAL” REVOLUTION, FOR UNLIMITED SUBSTRATES

M5, the "unlimited substrates" press. BOBST Digital Automation™ concept transforms flexo printing and die-cutting into a "digital" process. A "digital work flow" with integrated printing and converting technologies allows for 10 meters of waste and 1 minute for each job change, the highest quality consistency, and the lowest operating costs. A true "digital" revolution for the Labels and Packaging industry.

- ✓ Over-dimensioned chilled drums for "positive" web transportation on most "delicate" substrates
- ✓ "Easy" drop-in technology (BOBST Ready™) for fast interchangeability of flexo, screen and hot foil
- ✓ Digital Flexo 4.0™ for "closed loop" "pro-active" print quality/PDF control at all speeds
- ✓ Digital Flexo™ and DigiGap™ for digitally automated print and die-cutting pressure control the shortest "digital" set up time and waste digitally assisted, consistent quality during production
- ✓ DigiMount™ for true Digital Work Flow, from plate mounting to the press
- ✓ High-quality print cylinders, min. 5 ½" repeat, to reduce cost of flexo plates
- ✓ Metronome™ high-speed semi-rotary die-cutting to reduce cost of flexible dies
- ✓ ExcelCut™ and ExcelDie™ for automated exchange of flexible dies and magnetic cylinders
- ✓ Excellence™ for automated exchange of flexo print cylinders.

M5: the "digital" revolution in the Labels and Packaging industry.
"digital" micro-runs, long runs, profit, quality, all-in-one press.

The Benefits of DIGITAL AUTOMATION™

For every flexo + die - cut job
change:

10 mts of Waste, 1 Minute of
Time and Half the Operating
Costs
